Pediatric Pulmonology 5:275–276 (1988)

Subject Index to Volume 5

Acute respiratory insufficiency, 252
Airleak syndromes, 82
Airway disruption, 82, 247
Airway mechanics, 132
Alveolar complexity, 204
Alveolar ventilation, 225
Anesthesia, 62
Apnea, 186, 255
Arterial oxygen saturation, 96
Aspergillus fumigatus, 1
Asthma, 69
Asymptomatic patients, 74
Azygos lobe, 252

Basic imaging procedures, 158
Body positions, effects of, 152
Books Reviews, 62, 124, 183
Bradycardia, short and prolonged, 220
Bronchial compression, 51
Bronchiolitis, 96
Bronchoalveolar lavage, 192

Calcitonin gene-related peptide, 31
Candida albicans, 1
Central vs. subpleural sections, 100
Children over 6 years of age, 27
Clinical scoring system, 6
Closing volume, capacity of single-breath nitrogen washout, 198
CMV, 1
Collapsible bag, tube spacer, 247
Computed tomography, 158
Correspondence, 60, 123, 268
Cytologic study, 192

Dead space-to-tidal volume ratio, 225
Definition of statistics, 247
Density gradient methods, 176
Dexamethasone vs. placebo group, 27
Direct laryngoscopy, 55
Double-blind study, 244
Double capillary network, 204
Drug-induced immuno-compromise, 1

Early lung injury, 74
Elastic tissue development, 100
Expiratory flow rates, 27

Failure to thrive, 15
Fenoterol, ipratropium pretreatment, 139
Flexible bronchoscopy, 1, 55
Flow-volume curves, 145
Flow-volume loops, 152
Forced expiration, 152
Forced expiratory volume and flows, static lung volume, 198
FRC changes, 145
Frequency dependence, effect of age, 19
Friedman's and Cochran's Q test, 247
FTT and symptoms, 15

Gas-exchanging surface area, 100
Gastrin-releasing peptide, 31
Glycolipids, 176

Heart rate, 244
High frequency ventilation, 82
Histamine challenge, 139
H_2O_2 release, 192
Hyperinflation, 252
Hyperventilation therapy, 6

^{125}I-cyanopindolol radioligand assay, 69
Impedance-frequency function, 19
Inertance, compliance, resistance of respiratory system, 19
Infant pulmonary function testing, 96
Inflatable jacket technique, 145
Intercostal muscle vs. costal diaphragm EMG, 215

Kr-81m, 51

Logistic regression analysis, 6
Lung development, 204
Lung overdistension, 10
Lung volume, 15, 27

Magnetic resonance imaging, 158
Maximum expiratory flow at FRC, 145
Mean alveolar, end-tidal partial gas pressure, 225
Mean linear intercept, alveolar surface to volume ratio, volume proportions, 92
Mechanics, 15
Meconium ileus, 15
Mediastinal adenopathy, 51
Mucus glycoprotein, epithelial, 176

Nasal mucociliary clearance, 210
Nasal respiratory epithelium, 210
Nonparenchyma vs. parenchyma, proportions, 100
Normal infants vs. those with airway obstruction, 19
Nuclear medicine imaging, 158

O_2 desaturation, 220
Oligosaccharides, 176

Passive respiratory mechanics, 152
Peak expiratory flow rate, 244
Peak moving time average, 215
Pediatric intensive care simulation, 31
Penetration, 51
Peptide YY, 31
Perfusion scan, 51
Perspectives, 131, 191
Phasic inspiratory intercostal activity, 215
Placebo, 244
Pneumocystis carinii, 1
Pneumotachography, 145
Polygraphic monitoring, 220
Polysomnography, 55
Prematurity, 132
Pressure-flow relationships, 132
Pulmonary function assessment, 74
Pulmonary hypoplasia, 204
Pulmonary mechanics, 10

Radial count, 100
Radioimmunoassay, 31
Radiologic and microscopic examination, 55
Respiratory depression, 96
Respiratory inductance plethysmography, 145
Respiratory rate, 225
Respiratory resistance, forced oscillation method, 247
Rhinitis, 69
Risk factors: blood gases, ventilator settings, Apgar score, 6
RNA, DNA, protein, 92

Salbutamol aerosol, 244
Screening test, 210
Seasonal allergic, 69
Selected Abstracts, 63, 125, 184, 265
Serum IgE, 69
Sleep vs. nipple feeding, 220
Somatostatin, 31
Stereological techniques, 92
Steroids, 27
Superior vena caval syndrome, 252
Supportive therapy, 55

Tc-99mMAA, 51
Therapeutic implications, 51
Thoracic gas volume, 152

© 1988 Alan R. Liss, Inc.

Thoracotomy with and without pneumonectomy, 92
Total compliance for breath, 10

Ultrasound, 158
Ultrastructural study, 210
Unstimulated and stimulated AM, 192

Vagal reflex vs. reflex-independent mechanism, 139
Value of volume of isoflow, 74
Vasoactive intestinal peptide, 31
Ventilation scan, 51
Ventilatory function, 15
Ventilatory system impedance, real and imaginary part, 19
